During the last three years we have been living in the Northwest Frontier Province of Pakistan. There Karl has worked as technical advisor in the field of Environment and Natural Resources for The World Conservation Union (IUCN) under a mandate of SDC (Swiss Agency for Development and Cooperation).

On our numerous journeys we had the opportunity to explore the country and to get an insight of some remote areas and the way of living of its people.

Not only have we discovered breathtaking and picturesque landscapes but also incomparable traditions and surprising oddities. We met proud and extremely hospitable people. We have brought along unforgettable impressions and experiences - and a sizeable photo collection.

For the last years Pakistan has made mainly negative headlines in western countries. With this photo exhibition we intend to show a different view of Pakistan: Its natural and cultural diversity, its pristine every day life and its exotic aesthetics.
